IN THE ABSTRACT:

Please replace the Abstract of the Disclosure originally filed with the above-identified patent application with the following new Abstract of the Disclosure:

ABSTRACT OF THE DISCLOSURE

An at-home medical consultation system includes a reception server, a communication server, a mail server, an administration server, doctor terminals, a nurse terminal, a waiting room terminal, a reception terminal and a pharmacy terminal, and is connected to patient terminals via a communication line to provide an at-home medical consultation service by videophone. The communication server includes a destination table and provides a virtual consultation room, a virtual waiting room, a virtual nursing room and a virtual individual conversation room depending upon the desired operation. The patient terminal includes a nurse call button and a medical examination sensor such that the nurse terminal can be called when the patient's condition suddenly deteriorates and vital signs of the patient can be remotely monitored.
